

Dear Members of the FCC, I would like to urge you to reject the NAB's petition 04-160. I am an American citizen who buys American products. I recently purchased XM Satellite Radio and I enjoy everything it provides. I recently was researching the topic of America's Economy, based on a Free Market Economy, and I know that this market should not be interfered with through government intervention. XM Satellite Radio provides me with quality information other broadcasting lacks. Furthermore, I have the right to choose what information I listen to. Thank you very much, I look forward to your rejection of the NAB's petition of 04-160.

Sincerely,
Adam Christ
